APSC 101 Study Notes Intro to Engineering II

Contents

1.	Professional Skills	. 3
	1.1. Tuckerman's Stage of Development	. 3
	1.1.1. Important Notes	
	1.1.2. Good vs Bad Norming	
	1.2. Conflict Management	
	Risk Management	
	2.1. Risk Sources	
	2.2. Risk Tools	. 5

1. Professional Skills

1.1. Tuckerman's Stage of Development

Tuckerman's Stages of Development: Forming, Storming, Norming, Performing

Tuckman's Stages of Team Development

1.1.1. Important Notes

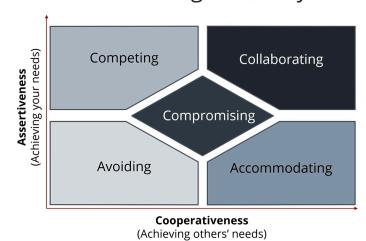

- relationships within members get BETTER over time
 - ▶ this includes storming, as team members are more willing to speak their minds
- conflict occurs at all stages

1.1.2. Good vs Bad Norming

- Good norming is healthy
- Bad norming -> team dysfunction
 - e.g. one team member routinely misses meetings and team does nothing

1.2. Conflict Management

Conflict Management Styles

Avoiding: Good when tensions high.

Accommodating: Good when the issue matters more to the other party.

Competing: Good when issue is self-critical and immediate.

Compromising: Good if time is short and relationships/problem must be balanced. **Collaborating**: When you have time to work towards finding the ideal solution for everyone.

Good teams change their style as situation demands.

2. Risk Management

 $Risk = Severity \times Likelihood$

 $Risk \neq Hazard$

Risk: *Possibility* of harm, consequences, or damage.

Hazard: Capacity of equipment, material, or processes to cause

harm.

2.1. Risk Sources

Preventable: Controllable.

General time management issues included, such as not anticipating delays.

Strategic: Taken for possibility of greater reward.

For example, rushing through decision making stages for earlier project completion, this is a strategic risk, not preventable.

External: Outside of control.

2.2. Risk Tools

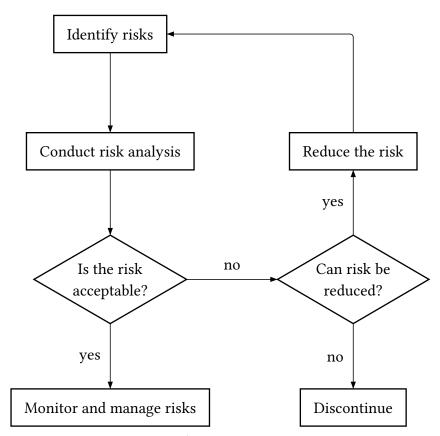

Figure 1: Risk Management Process

		RISK SOURCE				
		Preventable	Strategic	External		
RY	Safety			N/A		
CATEGORY	Technical					
RISK CAT	Project Management					
RI	Operational					

Table 1: Risk Classification Table

A risk classification table is a tool used to identify and classify risks based on their severity and likelihood.

		SEVERITY				
		1	2	3	4	5
	5					
000	4					
<u> Гікеціноор</u>	3					
Liki	2					
	1					

Table 2: Risk Matrix

ID	Description	SEVERITY	Likelihood	RATING	MITIGATION
1					
2					
3					

Table 3: Risk Register
